

PRE-ORDERS OPEN

Secure yield, *in your living room.*

CDG USDC is the first plug-and-play device that pays daily rewards in USDC. 10 USDC/day for the first three years, 5 USDC/day thereafter — a secure return that directly funds Codego Lab infrastructure and service development.

WHAT IS CDG USDC

A €5,000 device that pays you *every single day*.

Buy the device once. Plug it in. From day one it contributes compute to the CDG network and earns you **10 USDC/day for the first 3 years**, then **5 USDC/day** for the life of the device — all settled on-chain.

HARDWARE

Small box. Low power. *Real work.*

A silent 15W NPU node that runs inference, VPN exit-node and bandwidth workloads for the CDG network. Ships pre-provisioned — plug it in, open the app, it's online.

CHIPSET	NPU · 12 TOPS
POWER	15 W continuous
CONNECTIVITY	Gigabit + Wi-Fi 6
DIMENSIONS	210 × 140 × 38 mm
WARRANTY	36 months

From your outlet to *your wallet*.

STEP 01

Device runs

Your CDG USDC node contributes inference and bandwidth to the network 24/7, at 15W (\approx €3/mo electricity).

STEP 02

Network pays

Enterprise customers pay CDG for compute. Revenue is converted to USDC and pooled into the reward smart contract.

STEP 03

You receive

10 USDC/day on-chain for 36 months. Then 5 USDC/day for the life of the device. Verifiable on Polygon. Non-custodial.

STEP 04 · OPTIONAL

You spend

Swipe the CDG Mastercard. Yield converts to EUR at point-of-sale. IBAN + Apple/Google Pay built in.

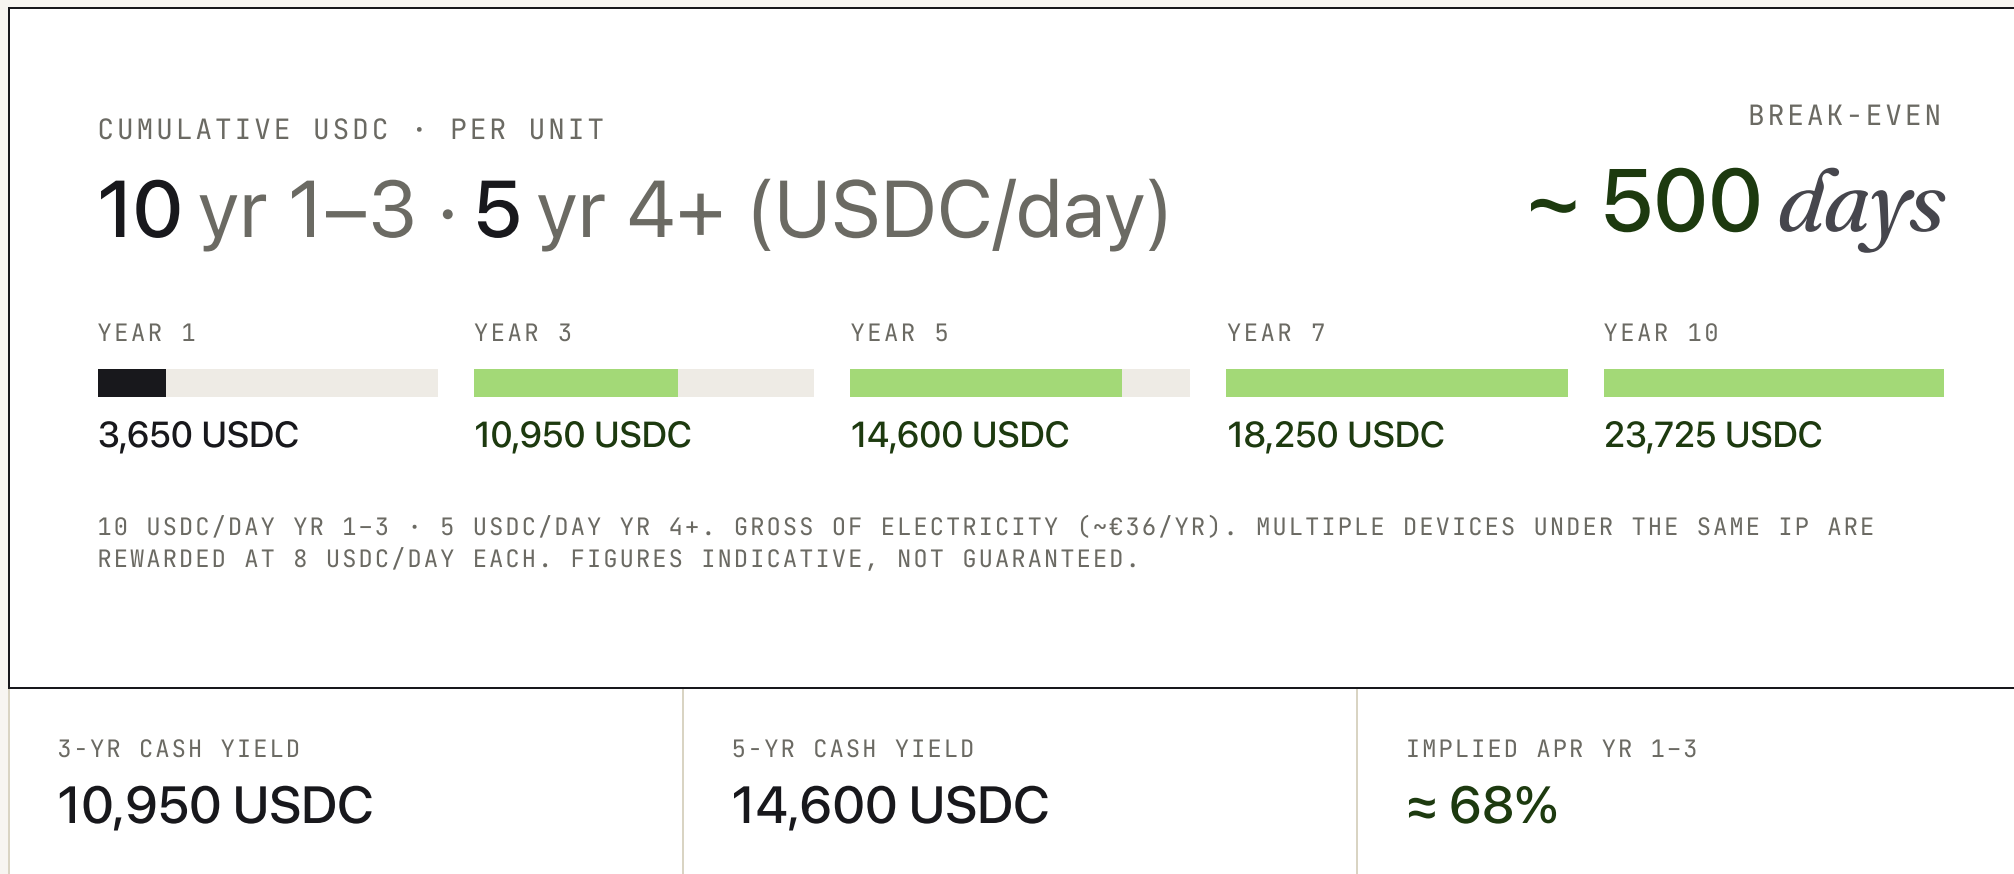

PAYOUTS SETTLE T+0 ON POLYGON ERC-20. REWARD POOL IS RING-FENCED AND AUDITED QUARTERLY. REVENUE BEYOND PAYOUTS FUNDS CODEGO LAB R&D AND NEW SERVICE INFRASTRUCTURE.

→ BREAKEVEN \approx 500 DAYS

WHAT AN INVESTOR SEES

Underwritable, *bankable,* predictable.

USDC removes token volatility. The device is an asset you own. The yield is an on-chain cashflow you can track to the minute.

Six reasons people *actually* buy.

<p>01</p> <h3>Secure, not speculative</h3> <p>Rewards paid in USDC on a fixed schedule — 10/day for 3 years, 5/day after. No token exposure.</p>	<p>02</p> <h3>You own the asset</h3> <p>Device is yours. No lockup, no staking contract, no liquidation risk.</p>	<p>03</p> <h3>Plug & play</h3> <p>Free installation. Setup in under five minutes. No crypto knowledge required.</p>
<p>04</p> <h3>Bankable yield</h3> <p>Spend it straight on the Mastercard, or send to your IBAN via SEPA.</p>	<p>05</p> <h3>Funds Codego Lab</h3> <p>Network revenue beyond payouts flows into R&D — new services, new hardware, new rails.</p>	<p>06</p> <h3>36-month warranty</h3> <p>Hardware + network guarantee. Full replacement if your unit goes dark.</p>

FIAT OFF-RAMP

From yield to *groceries*, in one tap.

Every holder gets an IBAN plus a physical and virtual Mastercard. Spend USDC rewards in real time, anywhere Mastercard is accepted.

- 01 Instant USDC → EUR at point-of-sale
- 02 Apple Pay & Google Pay on issuance
- 03 ATM withdrawals across 200+ countries
- 04 SEPA inbound / outbound on linked IBAN

WHO WE ARE

Ten years of fintech & *crypto* *infrastructure.*

Codego Group is a regulated fintech group operating IBAN issuance, card programmes and crypto payment rails across Europe. CDG Project is our compute-network vertical — devices deployed to consumers, yield distributed on-chain.
